## Supporting Healthy Kidney Function

RenAvast™ is a combination of amino acids and peptides proven in a two-year clinical study to stabilize and improve kidney values in cats. RenAvast™ is recommended as a nutritional supplement for cats having chronic renal failure (CRF). Additionally, it is recommended to use RenAvast™ in geriatric cats to prevent and/or halt the progression of CRF.

### RENAVAST MECHANISM OF ACTION

- Protects cells, particularly in renal tubules.
- Increases glomerular filtration rate (GFR).
- Increases gluconeogenesis.
- Decreases protein breakdown, especially in skeletal muscles.
- Has a strong anti-inflammatory effect.
- Decreases renal blood pressure.
- Increases renal vasodilation.
- Increases hormone that promotes renal tissue repair.

**DOSAGE:** For cats up to 10 lbs. in weight, give one capsule twice daily. For cats over 10 lbs. in weight, give two capsules twice daily.

**PACKAGING:** RenAvast™ is available in 60-count bottles. This is a 30-day supply for an average cat weighing less than ten pounds. Contact RenAvast™ Customer Care for veterinary wholesale pricing: 1-800-585-7187 Ext 1.

**HOW TO ADMINISTER:** Twist the capsule open and sprinkle the powder onto wet food. RenAvast™ can also be mixed with dry food and a little water. As RenAvast™ is odorless and tasteless, most cats eat it without hesitation. For the most finicky cats twist the capsule open and mix the powder with 1.5 cc water and slowly syringe the mixture into the side of the cat's mouth. RenAvast™ can also be pilled under the guidance of a veterinarian.

**INGREDIENTS:** RenAvast™ is a proprietary combination of amino acids and peptides.

**FUNCTION:** RenAvast™ (AB070597), manufactured by Bio Health Solutions, is a novel combination of naturally-occurring amino acids and peptides carefully formulated and specifically designed to support normal kidney function and maintain healthy Creatinine and BUN levels. Unlike other supplements and drugs, RenAvast™ does not treat the symptoms of renal failure, it treats the cause. Cats have seen improvement to their kidney function within weeks of starting RenAvast™. Reported improvements include but are not limited to coat improvement, increased appetite, decreased vomiting, weight gain and a general overall sense of feeling better.

- Backed by a two-year clinical study.
- 85-89% of cats in the study had stabilization or improvement of Creatinine and BUN.
- Three follow up clinical studies are currently underway (one for dogs).
- SAFE – Over 1,000,000 doses administered with no negative side effects reported.
- Easy to administer--sprinkle into food--cats eat it without hesitation.
- Requires no refrigeration.
- Five-year shelf life.
- Wholesale veterinary pricing available.
